

# Surveillance in a One Health perspective

*Hélène AMAR,*

*Chef du bureau de la gestion intégrée du risque, coordination des trois plateformes, DGAL*

# SURVEILLANCE IN A ONE HEALTH PERSPECTIVE

- Need for efficient, harmonised, integrative surveillance systems ;
- Two types of surveillance, both efficient and fully reactive for detection of zoonosis (new or re-emergent), included food borned diseases ; **event-based surveillance & Indicator-based surveillance**
- Collaboration between stakeholders, whatever public or private and between disciplines & sciences ;
- Strong coordination essential ;
- Need for governance in a One Health Perspective ;

# The epidemiological surveillance platforms ; an original governance for a sustainable and concrete OH approach

# THREE EPIDEMIOLOGICAL SURVEILLANCE PLATFORMS IN FRANCE

## ANIMAL HEALTH, PLANT HEALTH & FOOD CHAIN SURVEILLANCE

Public and private partners,  
Some collaborate to 2 or 3  
platforms

# THREE EPIDEMIOLOGICAL SURVEILLANCE PLATFORMS IN FRANCE

Les Plateformes  
de Surveillance

- Development of a **collective culture** ;
- Identification of health issues that require the development of an **integrated surveillance approach** ;
- Sharing of **experience, skills & data**, foster technology transfers ;
- Structure of **coordination intra and inter-platforms** ;

**A *ONE HEALTH CONTRACT* SIGNED BETWEEN ALL PARTNERS**

## PRENEZ DATE *SAVE THE DATE*

SÉMINAIRE DU 22 MARS 2022

### Les plateformes d'épidémiologie *The epidemiological surveillance platforms*

Ce séminaire, réunissant un ensemble d'acteurs européens et français, publics et privés, a pour objectif de promouvoir la gouvernance originale des plateformes d'épidémiologie en santé animale, en santé végétale et de surveillance de la chaîne alimentaire ; en décloisonnant domaines et disciplines, en favorisant la collaboration, en mutualisant compétences et données, leur organisation permet une approche globale de la santé, appelée « Une seule santé ».

*This seminar, which will bring together a group of European and French actors, public and private, aims to promote the original governance of the animal health and plant health epidemiological surveillance platforms and food chain surveillance platform ; by decompartmentalising fields and disciplines, by encouraging collaboration, by pooling expertise and data, their organisation allows for a global approach to health, known as «One Health».*
