Return on Investment of One HEALTH

Collaboration between FAO and CIRAD/PREZODE

Katinka de Balogh

Senior Animal Health and Production Officer/One Health focal
point FAO Investment Centre, Rome, Italy

Working for  #ZeroHunger

Background

- Return on investment or ROI = benefit of an investment relative to the cost of that investment
 - One Health context: ROI related to **integrated health outcomes for humans, animals and the environment in countries by investing in the application of One Health**
 - Requires consideration of multiple sectors, disciplines, One Health capacities and competences.
-

Aim

- Support countries in their assessments and decisions on investments on One Health
- Explore innovative economic assessments approaches for One Health Investments

Partnership:

- FAO's Joint Zoonoses Centre,
 - FAO's Investment Centre
 - Tripartite and UNEP as well as external experts (incl. OHHLEP),
 - Link with PREZODE initiative to ensure synergy between the work already initiated within PREZODE especially regarding country consultation and OH initiative mapping and typology, and others, where appropriate
-

Activities

- Conduct the in-depth desk study
 - Consultation with countries on ROI needs
 - Lead collaborative efforts with experts on ROI for One Health systems strengthening framework development; case studies
 - Develop refined ROI framework for One Health systems strengthening
 - Organise thematic online conference or workshop – interactivity is important
-

Output

- A document **describing a refined ROI framework for strengthening One Health systems** to serve as basis for investing and operationalization of the One Health approach for better animal, human and environment health outcomes

Characteristics:

- Country-orientated
 - Practical
 - With investment case in mind
 - Building the advocacy case for broad investment (linking to the One Health Joint Plan of Action)
-

Thank you
